Aviation Career Progression Model Examinations
12 May 2011

The ACPM augments the training required in Marine Air Command and Control System (MACCS) agency and unmanned aircraft system training and readiness (T&R) manuals with academics applicable to all MACCS and Unmanned Aircraft System (UAS) Marines throughout the training continuum. Examinations include:

- MAWTS8000X: ACPM-8000 MACCS
- MAWTS8020X: ACPM-8020 ACE
- MAWTS8040X: ACPM-8040 Threat
- MAWTS8060X: ACPM-8060 MAGTF
- MAWTS8080X: ACPM-8080 Joint Air Operations

MARINENET
Distance Learning Environment

www.marinenet.usmc.mil

- Search MarineNet: "ACPM"
- Passing grade: 80%
- Examinations require Proctoring by Learning Resource Center (LRC) Facilitator, MarineNet User of senior rank not enrolled in course, or a student's MarineNet unit Training Manager

No instructional materials are included with these MarineNet examinations.
These examinations are provided to standardize and simplify T&R assessments.

The Aviation Career Progression Model (ACPM) is designed t o enhance professional understanding of Marine Aviation and the MAGTF and to provide MOS 72XX/7314/59XX Marines with a knowledge of the doctrine and tactics techniques and procedures (TTPs) of aviation command and control.

The ACPM is designed to encourage Marines to read the doctrinal publications that outline aviation command and control.

ACPM academic training requirements are embedded in all MACCS agency and UAS T&R manuals within the progressive training phases to include the 2000, 3000, 6000, and 8000 phases of training.

These training requirements will be tracked and managed in M-SHARP.

"Priority #3: Better Educate and Train our Marines to Succeed in Distributed Operations and Increasingly Complex Environments"

General James F. Amos
Commandant of the Marine Corps
